# Sobre Nosotros

## About us

Azulev es una empresa de fabricación y comercialización de cerámica. Con más de 80 años de experiencia en el sector cerámico español. Desde sus inicios ha ido evolucionando de la cerámica tradicional a productos de gran formato e innovadores.

Azulev es un productor cerámico de materiales de revestimiento y porcelánico tanto en 10mm como en 7mm. Desde la adquisición en 2020 por parte de la empresa Rocersa también se refuerza la gama con productos de 20mm para espacios urbanos, públicos o exteriores, donde hay grandes cambios de temperatura donde la resistencia mecánica es un requisito técnico.

Esa inquietud por la innovación ha llevado a la empresa al desarrollo de la gama Slimrect, producto y proceso absolutamente enfocados al cuidado del entorno y dejar un mundo mejor para las generaciones futuras.

La protección del medio ambiente, la creación de productos sostenibles, el asesoramiento personalizado y el diseño vanguardista han permitido que esta empresa se consolide en el sector cerámico.

Azulev is a ceramics manufacturing and marketing company. With more than 80 years of experience in the Spanish ceramic sector. Since its beginnings it has evolved from traditional ceramics to large format and innovative products.

Azulev is a ceramic producer of cladding materials and porcelain tiles in both 10mm and 7mm. Since the acquisition in 2020 by the company Rocersa, the range has also been reinforced with 20mm products for urban, public or outdoor spaces, where there are large temperature changes and where mechanical resistance is a technical requirement.

This concern for innovation has led the company to develop the Slimrect range, a product and process that is absolutely focused on caring for the environment and leaving a better world for future generations.

The protection of the environment, the creation of sustainable products, personalised advice and avant-garde design have allowed this company to consolidate its position in the ceramics sector.

# Normas de mantenimiento

## Maintenance standards

### Limpieza y mantenimiento

Limpieza final de obra: Después de la colocación es fundamental realizar una buena limpieza con el fin de eliminar residuos de junta y en general suciedad de la obra. Para esta operación recomendamos el empleo de un detergente de acción ligeramente ácida que no despidan humos tóxicos y respete las juntas, el material y el usuario, como FILADETERDEK. En el caso de material colocado con junta epoxi o en base resina, se aconseja realizar la limpieza final de obra con un limpiador específico de residuos epoxidicos, como FILACR10.

Mantenimiento: Para un buen mantenimiento del pavimento se aconseja el empleo de un detergente neutro con alto poder limpiador como FILACLEANER. En los casos de suciedad intensa e incrustada acumulada en el tiempo, se aconseja consultar el esquema a continuación para encontrar el producto Fila ideal para cada situación.
